Global and European Context of AMR, WHO Recommendations to Latvia

Dr Danilo Lo Fo Wong Programme Manager for Control of Antimicrobial Resistance

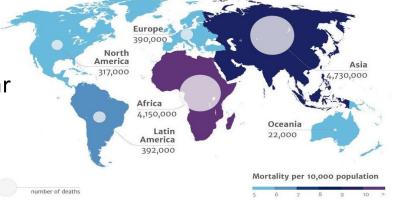

Antimicrobial resistance (2016)

- Claims lives, costs money, affects livelihoods, undermines health programmes
- Few new antibiotics in the pipeline
- Human health impact
 - By 2050, lead to 10 million deaths/year
- Economic impact
 - Reduction of 2 to 3.5 percent in GDP
 - Costing the world up to \$100 trillion

Antimicrobial resistance (2018)

Claims lives, costs money, affects livelihoods, undermines health programmes

- Few new antibiotics in the pipeline
- Human health impact in 33 OECD countries
 - 2.4 million deaths between 2015 and 2050
- Economic impact in 33 OECD countries
 - Costs: \$ 3.5 billion/year to deal with complications
 - Savings: \$ 4.8 billion/year if investing in comprehensive public health package

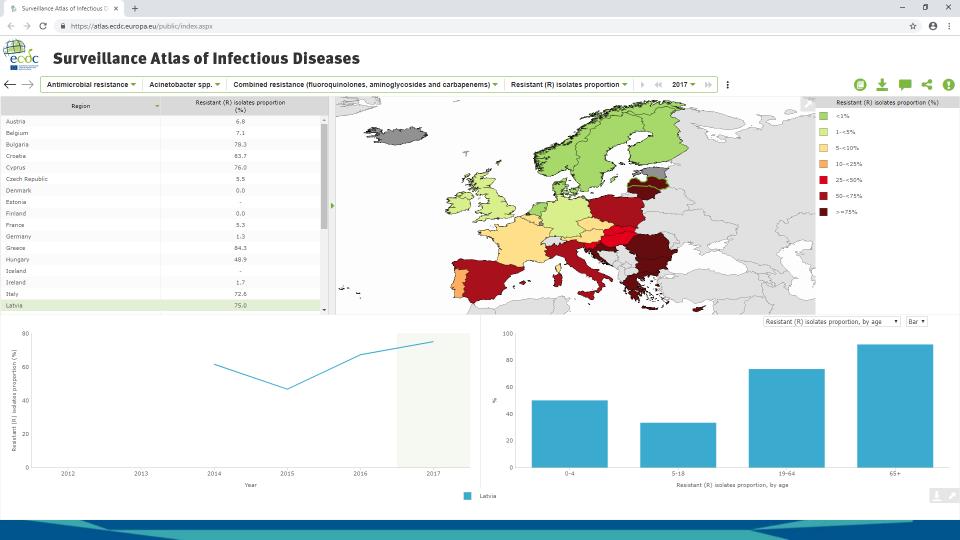

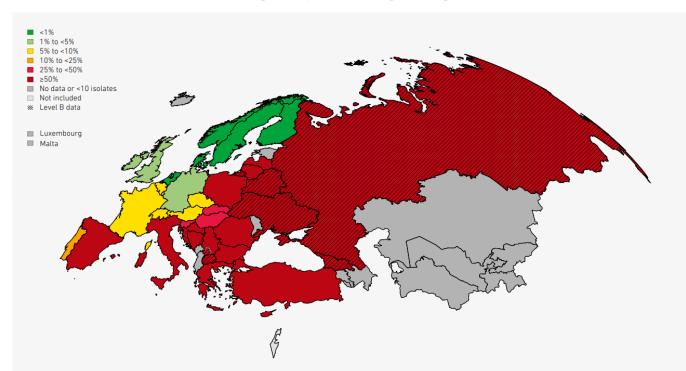

EARS-Net and CAESAR data

Level B data: the data provide an indication of the resistance patterns present in clinical settings in the country or area, but the proportion of resistance should be interpreted with care. Improvements are needed to attain a more valid assessment of the magnitude and trends of AMR in the country or area. See section 4.2 for more information about levels of evidence, which are only provided for CAESAR countries and areas.

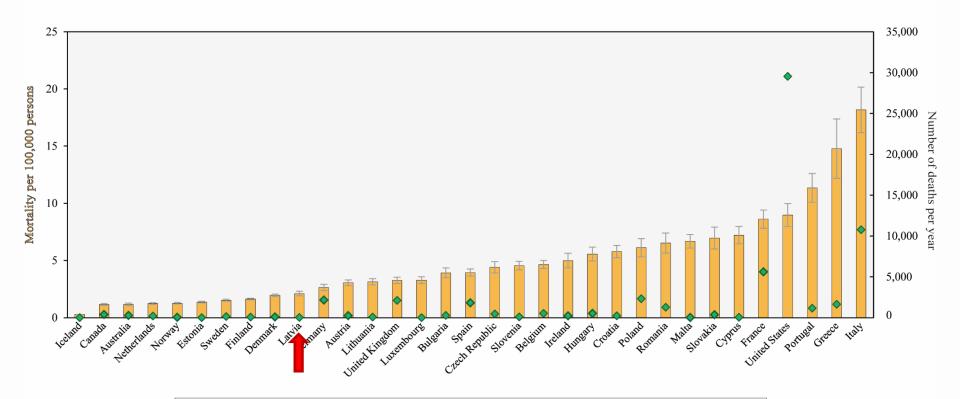

EARS-Net countries: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden and the United Kingdom.

CAESAR countries and areas: Albania, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Georgia, Kazakhstan, Kyrgyzstan, Montenegro, the Republic of Moldova, the Russian Federation, Serbia, Switzerland, Tajikistan, the former Yugoslav Republic of Macedonia, Turkey, Turkmenistan, Ukraine, Uzbekistan and Kosovo (in accordance with United Nations Security Council resolution 1244 (1999)).

Data sources: 2017 data from the Central Asian and Eastern European Surveillance of Antimicrobial Resistance (CAESAR, ©WHO 2018) and 2017 data from the European Antimicrobial Resistance Surveillance Network (EARS-Net, ©ECDC 2018).

Acinetobacter spp. in the European Region (EARS-Net and CAESAR), 2017 and carbapenems

Average annual number of deaths due to AMR in OECD countries 2015-2050

Global AMR Action Plan - Strategic Objectives

http://who.int/antimicrobial-resistance/global-action-plan/en/

- 1. Improve awareness and understanding
- 2. Strengthen knowledge and evidence base
- Reduce incidence of infection
- 4. Optimize use of antimicrobial medicines
- Develop economic case for sustainable investment

Global activities

- World Antibiotic Awareness Week (2015)
- Global AMR Surveillance System (GLASS) (2015)
- Global Antibiotic Research & Development Partnership (GARDP) (2016)

- Infection Prevention and Control core components (2016)
- Global Priority Pathogens List of Antibiotic-Resistant Bacteria (2017)
- Updated Essential Medicines List update (2017)
- Global Framework for Development & Stewardship

Monitoring global progress on AMR

- 154 out of 194 Member States responded
 - Response rate 79.4%
 - Representing 91.3% of world population
 - Representing 95.9% of global GDP
- 50 out of 53 European Member States responded
- Report available online
- Global Database for AMR Country Self Assessment

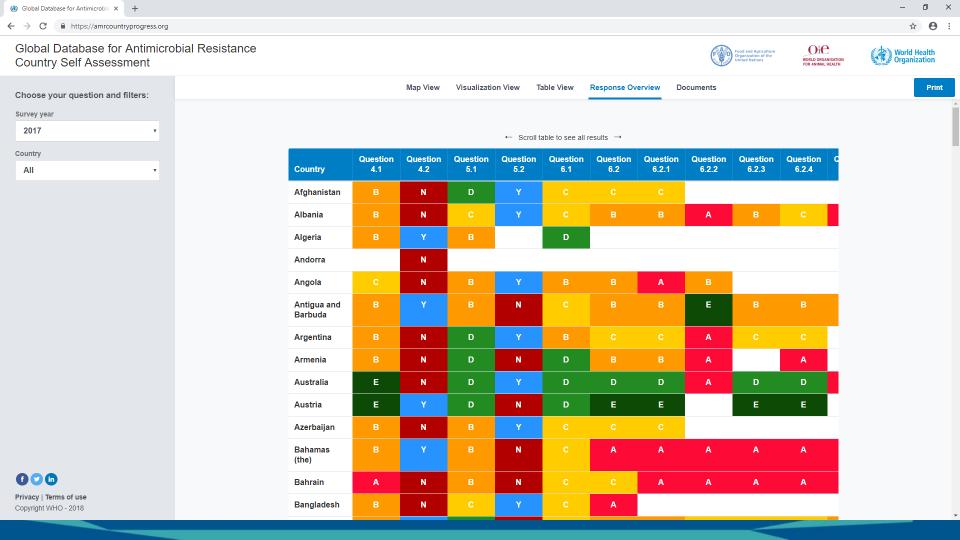

Key results from Latvia

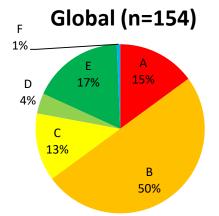

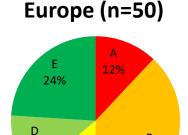

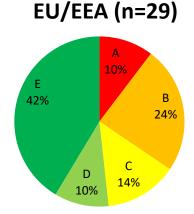

One Health collaboration / coordination

- A No formal multi-sectoral governance or coordination mechanism exists.
- **B** Multi-sectoral working group(s) coordination committee on AMR established with Government leadership.

14%

12%

C - Multi-sectoral working group(s) is (are) functional, with clear terms of reference; regular meetings, and funding for working group(s). Activities and reporting/accountability.

38%

- **D** Joint working on issues incl. agreement on common objectives, restriction of use of critically important antimicrobials.
- **E** Integrated approaches used to implement the national AMR action plan.

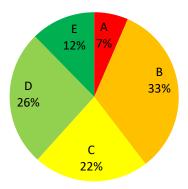

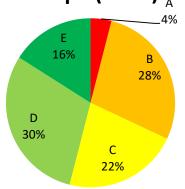

Progress on national action plan development

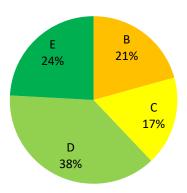

Europe (n=50) ₄

EU/EEA (n=29)

- A No national AMR action plan.
- **B** National AMR action plan under development.
- **C** National AMR action plan developed.
- D National AMR action plan approved by government that reflects Global Action Plan objectives, with an operational plan and monitoring arrangements.
- **E** National AMR action plan has funding sources identified, is being implemented and has relevant sectors involved with a defined monitoring and evaluation process in place.

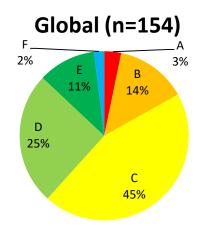

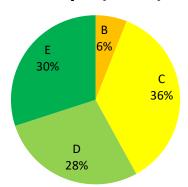

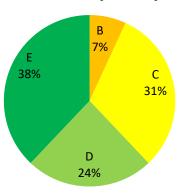

Raising awareness in human health

Europe (n=50)

EU/EEA (n=29)

- A No significant awareness-raising activities on ABR.
- **B** Some activities in parts of the country to raise awareness of ABR and actions that can be taken.
- **C** Limited or small-scale ABR awareness campaign targeting some, but not all, relevant stakeholders.
- D Nationwide, government-supported ABR campaign targeting all or the majority of stakeholders.
- E Focused, national scale government-supported activities implemented to change behaviour in target groups, both public and private
- **F** Missing answer

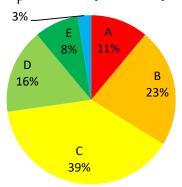

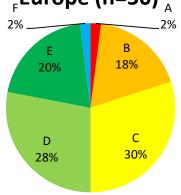

Training/professional education in human health

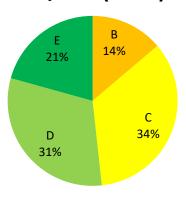

EU/EEA (n=29)

- A No training for human health workers on AMR.
- **B** Ad hoc AMR training courses in some health related disciplines.
- C AMR covered in some pre- and in-service training or other continuing professional development (CPD) for health workers.
- D AMR covered in pre-service training for all relevant cadres. In-service training/CPD for all types of health workers nationwide.
- E AMR systematically and formally incorporated in pre-service training for all relevant human health cadres. In-service training/ CPD on AMR taken up nationwide, in public and private sectors.
- **F** missing the answer

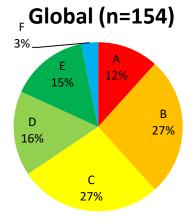

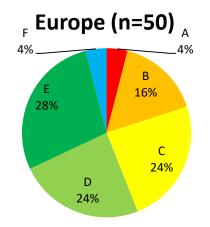

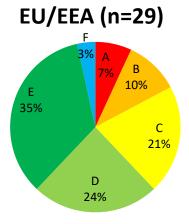

Infection Prevention and Control in human health care

A - No national IPC programme or operational plan available.

World Health

REGIONAL OFFICE FOR Europe

- **B** National IPC programme or operational plan available. IPC and water, sanitation and hygiene (WASH) and environmental health standards exist but not fully implemented.
- C National IPC programme and operational plan available and national guidelines available. Selected health facilities are implementing guidelines, monitoring and feedback in place.
- **D** National IPC programme available according to WHO IPC core components and IPC guidelines implemented nationwide.
- **E** IPC programmes in place and functioning at national and health facility levels according to WHO IPC core components

guidelines.

A five-pronged assault on AMR

Promoting better hygiene

Objective 3

Ending over-prescription

Objective 2

 Rapid testing to distinguish viral from bacterial infections

Objective 1

Delays in prescribing

Objective 2

Mass media campaigns

Objective 8 & 9

Draft action plan - Observations

- Elaborate situation analysis provided
 - Global, regional and national
 - Strong evidence base / good data
- One Health approach
 - Human, animal and environment health actions defined
 - Cross-governmental engagement
- Aligned with the Global AMR action plan
 - Comprehensive
 - Relates to the 5 Strategic Objectives

HEALTH cannot be

separated

Draft action plan - Recommendations

Consider:

- Restructuring the document
 - Strategy with vision, goal
 - Background section/rationale
 - Operational plan, incl monitoring & evaluation
- Redefine some of the objectives
 - Avoid overlap in scope between the objectives
 e.g. AMR surveillance in 1, 2, 3, 7
 - Collapse objective 8 and 9 (One Health)

WHO/Europe implementation activities

- Implementation of European strategic action plan (2011-2020)
 - 7 Strategic Objectives
 - Aligned with Global action plan
- Mostly focused on non-EU MS
 - Governance and national action plans
 - AMR/AMC surveillance
 - Awareness raising

More interaction with EU MS

2017 EU Health Programme Work Plan

Support to National Action Plan on AMR development and implementation

- Policy support
- National Action Plan development
- Infection prevention and control
- Awareness and behaviour change
- Antimicrobial stewardship

Making progress

- Progressing on all strategic objectives
- Broad collaboration
 - Within WHO (Global Regional National)
 - With International Organizations (FAO, OIE)
 - With external partners (international, national)
 - With donors (countries, foundations)
- Supporting materials /tools developed and distributed
- Pool of experts/consultants
- Third global survey planned Q4 of 2018

Good news

3 out of 4 deaths due to AMR could be averted by spending 2 USD per person per year on measures as simple as hand-washing and more prudent prescription of antibiotics ...

Thank you for your attention
